20.7

(Amended) A portable computer unit comprising:

- (a) a portable computer housing;
- (b) computer means positioned in said housing;
- (c) a plurality of key switches interfaced to said computer means and mounted on said housing;
- (d) flat panel display means interfaced to said computer means;
- (e) a transparent membrane switch array interfaced to said computer means and overlayed on said display means; and
- (f) closure panel means having said display means and said array mounted thereon on an outer side and connected to said housing in such a manner as to [position] enable said closure panel means to be positioned in covering relation to said key switches with said display means and said array facing away from said key switches and to enable pivoting said closure panel means away from said housing to provide access to said key switches.
